РуСharm – это интегрированная среда разработки (IDE) для программирования на языке Python, разработанная чешской компанией JetBrains. У PyCharm есть две версии: PyCharm Community Edition – бесплатная версия, находится под лицензией Apache License, и PyCharm Professional Edition – профессиональная версия продукта, обладающая дополнительной функциональностью, является проприетарным ПО.

## Необходимое программное и аппаратное обеспечение

#### Операционная система:

- Windows 8, 10 или 11 (64-битные версии);
- macOS 10.14 или более поздняя версия;
- Linux со средой GNOME, KDE или Unity DE; если дистрибутив не включает Glibc 2.14 или более позднюю версию (например, RHEL 6 или CentOS 6), то PyCharm может быть для него недоступен.

Процессор: никаких специальных требований нет, но рекомендуется, чтобы он был многоядерным, так как РуСharm поддерживает многопоточность. Это позволит выполнять операции быстрее.

Оперативная память: 4 ГБ свободной RAM. Рекомендуется, чтобы общая оперативная память у устройства была 8 ГБ.

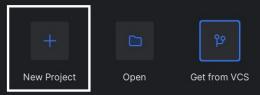

*Место на диске:* 2,5 ГБ и ещё 1 ГБ для кэша. Рекомендуется использовать SSD и иметь хотя бы 5 ГБ свободного пространства.

Разрешение экрана: не менее  $1024 \times 768$  пикселей, рекомендуется  $1920 \times 1080$ .

Create a new project to start from scratch.

Open existing project from disk or version control

You can find the onboarding tour under Help > Learn IDE Features, where you can choose the Get Acquainted with PyCharm lesson.
